International Conference
of Electroluminescence and
Optoelectronic Devices

13th International Conference on Electroluminescence and Optoelectronic Devices

ICEL 2021 will bring together experts from all over the world and provide an excellent opportunity for networking with like-minded scientists. Follow the latest developments in the field and share your findings with the entire community working on electroluminescence and optoelectronic devices. The themes covered at ICEL 2021 will reflect the latest trends in the emissive materials community. Expect presentations from world-leading experts and interactive discussions on a wide range of topics with particular emphasis on the following:

- **Material development**

Organic semiconductors for OLEDs; quantum dots (QDs); perovskites; related hybrid materials

- **Fundamentals**

Exciton formation, diffusion and relaxation (TADF, phosphorescence); interfacial phenomena; spectroscopy and related photophysical studies

- **Device physics**

Charge injection and transport; p/n-doping and polarons; device optics and light outcoupling; molecular orientation; emerging device concepts

- **Processing**

Large-area deposition; high resolution patterning; solution-processing and printing; self-assembly; related fabrication techniques

- **Device engineering and applications**

Organic light-emitting diodes (OLEDs), perovskite LEDs, quantum-dot LED or hybrid LEDs; flexible and stretchable devices; NIR OLEDs and other devices emitting outside the visible spectrum; organic and hybrid lasers; emerging applications of emissive materials including in biomedicine

A comprehensive and wide reaching marketing campaign with flyers, first / second announcements, call for papers, mailings, newsletters, website, flags and much more conveys, the ICEL 2021 message to the target groups.

We look forward to welcome you as a sponsor or exhibitor at the ICEL 2021!
